

What's New?

New devices, new software, new services,
and new publications to make it all easy to understand.

Our reader surveys tell us that the *Xcell Journal* is the primary source of programmable logic information for most of our customers. Your responses are overwhelmingly positive, and most of you tell us that you want more of the same; more articles, more information, more often. In response, we are launching a new series of publications that focus on the topics in which you are most interested.

We have three new magazines that will initially be produced every six months:

- *Embedded Magazine*, focusing on the use of embedded processors in Xilinx® programmable logic devices. (You'll discover simple and efficient methods of implementing highly optimized application-specific processor platforms more quickly on our devices.)
- *DSP Magazine*, focusing on the high-performance capabilities of our FPGA-based reconfigurable DSPs. (You'll find that you can create extremely high-performance DSP designs with relative ease.)
- *I/O Magazine*, focusing on the wide range of serial and parallel connectivity options available in Xilinx devices. (You'll see that your choices are almost unlimited.)

These magazines will help you explore topics that interest you the most and not waste your time with irrelevant details.

In addition to our new magazines, we've also created Solution Guides, designed to provide useful information on a wide range of hot topics such as Broadcast Engineering, Power Management, and Signal Integrity. As new industry challenges emerge, these Solution Guides will help you find answers quickly.

Until we assess the demand, these new publications are primarily available as PDF downloads (of individual articles and of whole publications). If we find sufficient demand, we plan to offer subscriptions to printed versions of these publications as well.

Please visit our publications website at www.xilinx.com/xcell/.

If you find these new publications of value to you, send me a note and tell me what you think. For example, are PDF formats sufficient, or do you prefer printed copies mailed to you, like the *Xcell Journal*? Would you prefer to read them online in HTML format?

Thanks again for your feedback; it helps us serve you better.
