The Virtex®-5 Family: The Ultimate System Integration Platform

- Increase Your System Performance
- Lower Your System Cost
- Design with Ease

The Virtex-5 family delivers unparalleled system integration capabilities for driving your most mission-critical, high-performance applications. With a choice of four platforms optimized for logic, serial connectivity, DSP and embedded processing with hardened PowerPC 440 processor blocks, the Virtex-5 family delivers an unprecedented combination of flexibility and performance—backed by world class application support.

Only the Virtex-5 family offers you a complete suite of design solutions built on proven 65nm technology in devices shipping today.

Get started on your Virtex-5 design. Visit www.xilinx.com/vise for a free 60 day evaluation of any ISE Design Suite 10.1 product.
