

## **Xilinx Statement Regarding Conflict Minerals**

Xilinx has always been committed to transparent business practices and to the highest ethical standards. These commitments are embedded in our company vision and in our corporate responsibility approach that is based on the Electronics Industry Citizenship Coalition Code of Conduct. <http://www.eiccoalition.org/>

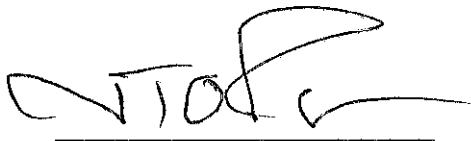

Furthermore, we expect our suppliers to conduct their worldwide operations in a manner that does not result in labor or human rights violations, such as the direct financing of armed conflict in their role as responsible corporate citizens.

“Conflict Minerals” refer to specific minerals originating from mines controlled by armed groups in the Democratic Republic of the Congo (DRC) or the adjoining countries which share internationally-recognized borders with the DRC (Angola, Burundi, Central African Republic, Republic of Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia).

The specific minerals listed below are used in certain semiconductor manufacturing processes:

- Cassiterite (Tin)
- Coltan (Niobium and Tantalum)
- Gold
- Wolframite (Tungsten)

Xilinx does not knowingly use minerals and their byproducts originating from mines controlled by armed groups in the DRC or the adjoining countries.

Glenn O'Rourke  
Vice President, Supplier Management & Corporate Cost Center  
Xilinx, Inc.
