

Solarflare Quality and Environmental Management System (IMS) Policy

Solarflare is the global leader in application-optimized network solutions. From software to silicon, Solarflare delivers a comprehensive, integrated set of technologies for distributed, ultra-scale, software-defined data centers.

Solarflare technology unlocks the potential in your enterprise, private or public cloud data center by maximizing revenue streams, enhancing quality of service and expanding capacity. Trusted by the global financial services industry for more than a decade, Solarflare solutions provide the backbone for the world's economy. Solarflare leverages this same exacting technology to improve end-user cloud experiences by reducing abandonment, increasing download speeds, minimizing page loading and eliminating buffering.

Solarflare is committed to:

- Delighting our customers
- Providing high-quality products
- Protecting the environment

We accomplish this by:

- Providing innovative solutions which enable our customers' success
- Incorporating quality into our design, manufacturing and distribution
- Complying with environmental legal, and other requirements
- Delivering exceptional customer support
- Meeting or exceeding our commitments
- Our commitment to continuous improvement
