

Product Discontinuation Notice PDN98006

Discontinuation of the XC4003A M-grade and B-grade (SMD) Products

Subject: Discontinuation of the XC4003A M-grade and B-grade (SMD) Products (note: this notice does not affect the commercial and industrial grades of the XC4003A or any other member of the XC4000 Family)

Products Affected: The XC4003A M-grade and B-grade (Standard Military Drawing 5962-94712) Products in the PG120 and CB100 package only.

Change Description: The M-grade and B-grade versions of the above product are being discontinued (all package and speed grades). This does not affect Xilinx offering of the C-grade and I-grade versions of the XC4003A.

Reason For Change: Low customer demand for the M-grade and B-grade versions of the XC4003A has not merited continued support. This discontinuation affects this low volume product in the Xilinx Military and Aerospace product line only. Xilinx has recently received full QML certification and remains fully committed to the market as is evidenced by the recent introduction of the XQ4000X family, which are recommended replacements for the discontinued products. Support will continue for the XC3000 and the balance of the XC4000 Military and Aerospace lines.

Key Dates: Last date to order any of the above products is 1 July 2000 with final delivery on or before 1 October 2000. This allows more than two years to plan for this product obsolescence.

Response: No response to this notification is required. Requests for additional data or support should be made within 90 days of notification. Please address any questions you may have via email at "pcn@xilinx.com", or directly by fax at 408 559 1368.
